

SRN-202101152

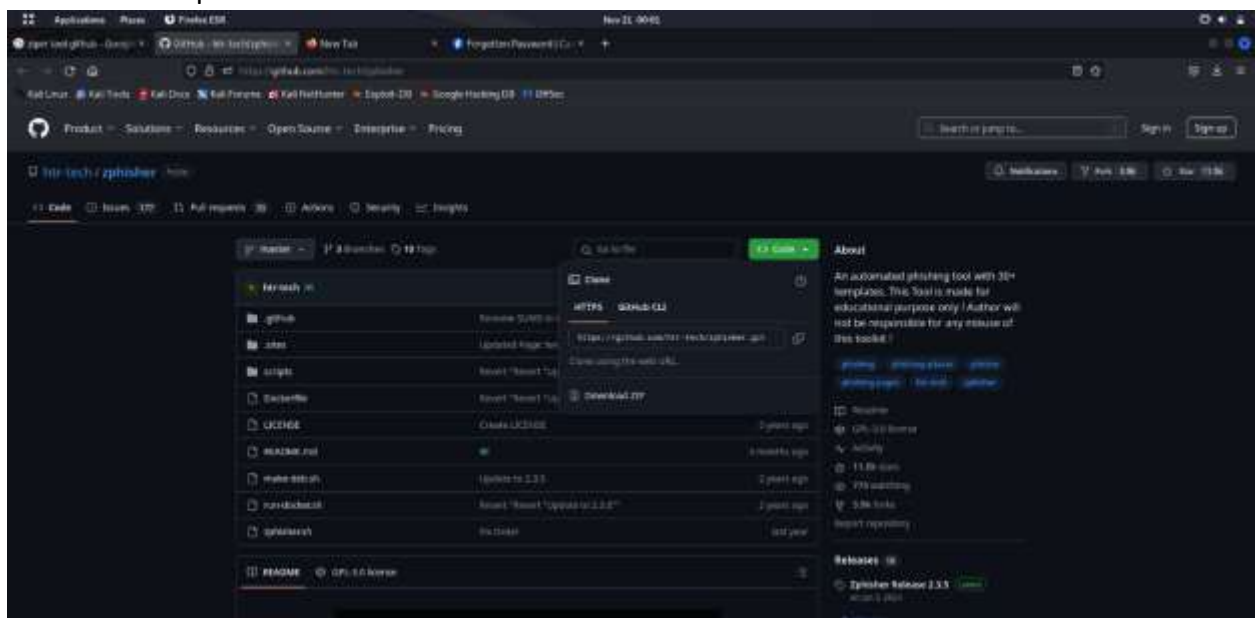

PRN-2181370091 ROLL NO.-49

SUBJECT – EHPT Lab

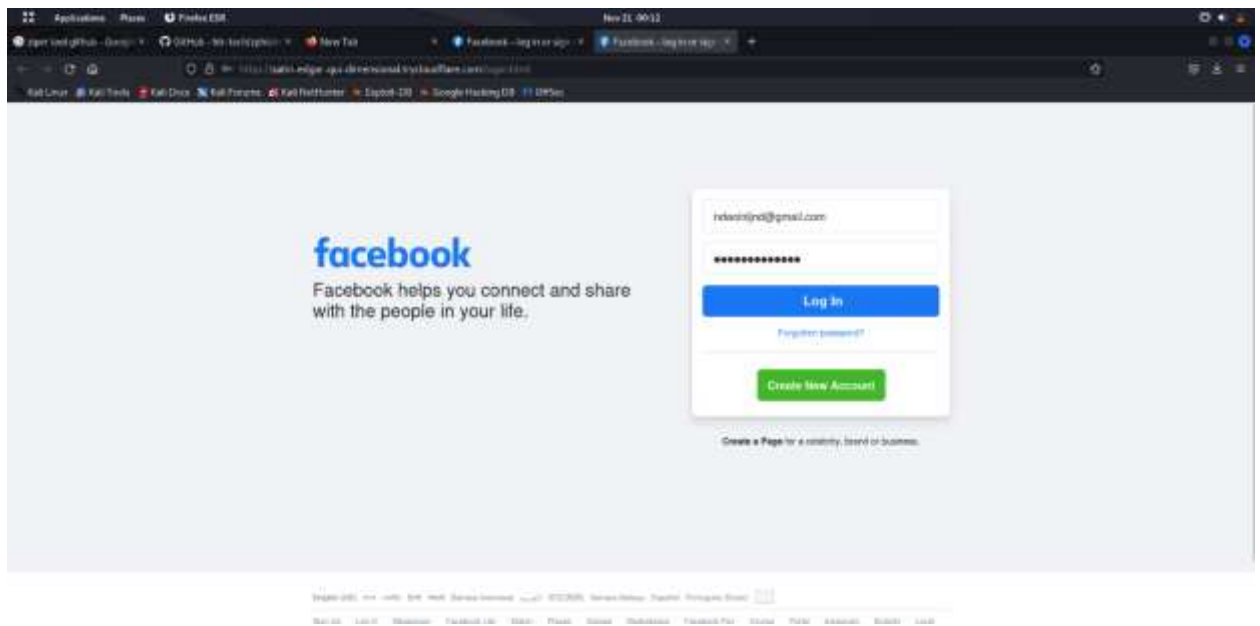

TOPIC – Social Engineering Attack [Phishing Attack]

Steps to Perform phishing attack Using Zphisher

- ## 1. Git clone the Zphisher tool

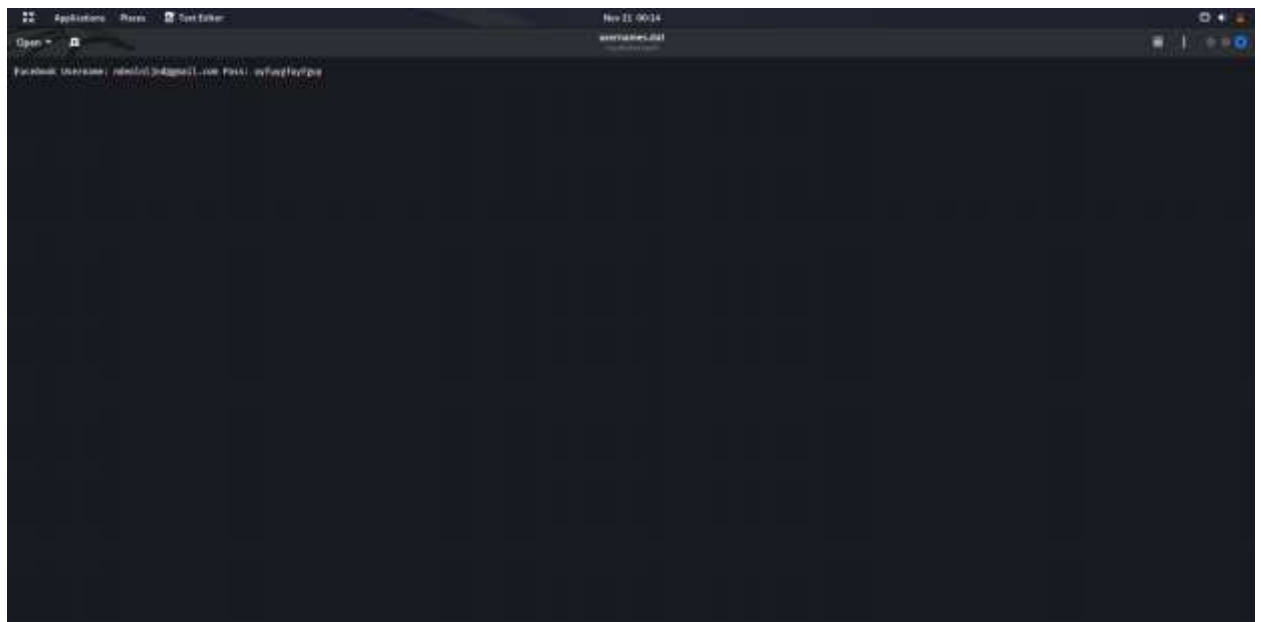

2. Run the Bash file “zphisher.sh”

6. The zphisher will show information such as IP address, username, password, etc.

Just send the above malicious url in mail, text, etc. and you we will get the username and password of the User and then able to exploit it.
